

APHRS-Certified Fellowship Training Centre

Name of Training Centre	EP Lab, Chang Gung Memorial Hospital, Linkou Branch
Short Introduction	The electrophysiology and radiofrequency catheter ablation was first introduced by Professor Delon Wu in 1978. The first permanent pacemaker was implanted in 1993. Currently we not only perform conventional radiofrequency ablations, but also have 3-dimensional electroanatomical mapping system to facilitate all kinds of complex radiofrequency catheter ablations, including atrial tachycardias, atrial fibrillation, and ventricular tachycardias. In addition to permanent pacemakers, we are experienced in implantable cardioverter-defibrillator and cardiac resynchronization therapy.
