

## APHRS Fellowship Training Centre

<b>Name of Training Centre</b>	Renmin Hospital of Wuhan University
<b>Short Introduction</b>	<p>Renmin Hospital of Wuhan University, also known as Hubei General Hospital, was founded in 1923. For a century, the hospital has adhered to its founding philosophy of "Everything for the People's Health," devoutly upholding the sanctity of medicine and the dignity of life, while striving to build itself into a "world-class hospital." As one of China's first Class-III Grade-A hospitals, it now comprises three campuses—Shouyi, Optics Valley, and Hongshan—with 6,336 open beds and 160 medical units. Its medical services extend across the nation and radiate globally. It is now recognized as a national-level medical center. Over the past five years, it has consistently ranked among the top 10% in China's public hospital performance evaluations, with 11 disciplines ranking in the top 20 nationwide. The hospital hosts multiple National Key Laboratories and branch centers of National Clinical Medical Research Centers. Its groundbreaking original research achievements have consistently been published in top-tier international journals such as Nature and Cell. The institution has received five national top-level scientific awards, including the First Prize of National Science and Technology Progress Award. Over the past five years, its Department of Cardiovascular Medicine has ranked first in scientific impact score among large general hospitals in China, with global academic activity ranking 4th worldwide. The hospital has established a first-clinical medicine doctoral program and a postdoctoral research station, and has been designated as a National Clinical Teaching and Training Center. It annually undertakes the clinical education and training of over 4,000 medical students and physicians from Wuhan University. The institution maintains joint education programs with multiple universities and hospitals in Europe and the United States, and has trained 393 international medical students in China over the past five years. Leveraging 14 national-level key disciplines and specialized departments, the hospital has innovatively established nine specialized hospitals within the hospital focusing on cardiovascular diseases, neuropsychiatry, ENT, gastroenterology, urology &amp; nephrology, oncology, obstetrics &amp; pediatrics, orthopedics, and metabolism &amp; pan-vascular diseases.</p>
